## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Curtis (US 6,081,769).

Curtis discloses a single wire data acquisition and communication apparatus for a railcar. The data acquisition acquires the data from either end of the train of railcars and transmits and receives the information wirelessly via satellite. Pressure sensors are situated on the train and work in data acquisition of information to send from one end of the train to the locomotive to a touch pad display so the operator can monitor the pressure of the brakes throughout the line of vehicles.

Regarding claims 19 to 36 drawn to the method of operating. It is inherent that since the apparatus is disclosed the same method of operating would be used.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Vogt (US 5,740,992), Halvorson et al (US 6,360,998) and Diana et al (US 6,421,587) all disclose types of data acquisition and communication systems.
